

WordPress Developer - The Women in Economics Initiative

Are you interested in gender, economics and know how or want to learn about to manage a professional website? The Women in Economics Initiative (WiE) is looking for a new team member to join the website team!

This opportunity is well-suited to someone with experience or interest in learning both back-end and front-end website development, including creating WordPress (WP) themes and plugins, and who understands professional aesthetics.

Being a part of the WiE team gives you access to a network of young professional economists, exclusive workshops and events, as well as the opportunity to help shape and grow an up-and-coming professional network.

As a WordPress Developer, your tasks will involve spending **an average of 2 hours per week** with the main responsibilities being:

- Assisting the website team to manage the website
- Developing an understanding of the WP library and other common practices to produce great WP-based products
- Updating WP plugins, modules, and themes
- Ensuring new features work properly in all environments while overcoming conflicts with popular themes and plugins
- Helping to develop the empirical methodology and creating automated tools for data retrieval.

We are looking for a candidate who has at least some of the following technical competences, or who is enthusiastic to learn them:

- HTML
- CSS
- JavaScript
- PHP
- Text Editor (Notepad ++, Sublime, Atom, or Brackets.io)
- SEO

The candidate should also be able to work reliably both in teams and individually, and have good English skills.

Please send your application to our HR coordinator jess@women-in-economics.com

We are looking forward to receiving your application!
